

Trap, Spay/Neuter, Vaccinate, Return/Adopt

Trapping provided by The Purrfect Catch volunteers *

* Trapping data varies based on volunteer schedules and colony trapping needs. *In December 2011, a new colony was identified in South San Francisco; 44 cats/kittens were trapped, spayed/neutered, vaccinated and adopted/returned. Volunteers feed these cats daily and monitor their medical needs. In 2013, 4 cats and no kittens have needed to be TNRed at this location.*
